**DETAILED ACTION**

1. All claims are allowed over the prior art of record.

***Response to Arguments***

2. The 35 U.S.C. § 103 rejections presented in the Previous Office Action (**dated 10/19/2009**) have been withdrawn in view of the appropriate amendments and arguments. The claims are allowed based on the reasons presented below.

***Information Disclosure Statement***

3. An IDS has not been submitted to the Office for consideration. Full faith and credit is extended that all parties involved have complied with their duty to disclose, per requirements set-forth in the MPEP.

***35 U.S.C. § 101***

4. Claim 1 is deemed statutory in view of the current Patent Office Policy with respect to 35 U.S.C. § 101. The execution of a model necessitates physical computing hardware.
5. Claim 25 is deemed statutory because the "medium" brings it into the statutory and tangible realm. Specifically, the medium is interpreted to be physical and not carrier media. This is consistent with the Specification.
6. Claim 48 is deemed statutory because the modeling is implicitly performed by a computing processor.
7. Claim 54 is deemed statutory because of the display output (requiring display device) / target device of the output of information.
8. Remaining independent claims are statutory for the above-recited reasons.
9. Dependent claims are statutory by virtue of their dependency and incorporation of statutory matter.

***Allowable Subject Matter***

10. The following is the Examiner's statement of reasons for allowance:
11. As per claim 1, the most relevant prior-art of record is set-forth in the Previous Office Action as the 35 U.S.C. § 102 / 103 rejection.
12. As per claims 1, 25, 54, and 55, the matter that renders the claims allowable over the best prior-art of record is emphasized below.

Art Unit: 2128

"where said *block methods perform operations on behalf of said block* when said block methods execute and said block is an owner of said block methods performed on behalf of said block"

in combination with

"where said *model view and block method execution list view are simultaneously displayed using a display device; sending debug information from said execution engine to said graphical debugger, where said debug information is related to said execution of said model"*

and further in combination with

"simultaneously displaying said model view and said block method execution list and virtually indicating a current execution method in said block method execution list; and altering said model view to visually indicate the owner of said currently executing method."

13. As per claims 48, 56, and 61, the matter that renders the claims allowable over the best prior-art of record is emphasized below.

providing a computer-based modeling application that executes a model comprising blocks, each block having a sample time and including a plurality of block methods, where said *block methods perform operations on behalf of the block when said block methods execute;*  
determining whether the modeling application should execute the model in a single task simulation loop or a multi-task simulation loop, wherein said model is executed in said single task simulation loop if said model is a single rate system wherein said sample time for each of said blocks is the same and said model is executed in said multi-task simulation loop if said model is a multi-rate system wherein at least one sample time for at least one of said blocks is different from at least one sample time for another one of said blocks;  
executing said model using said single task simulation loop or said multi-task simulation

14. Dependent claims are allowable because they incorporate allowable subject matter of the above-allowed claims.

Art Unit: 2128

The art of record, either individually or in combination, fails to teach, suggest, or render obvious invention having the corresponding function that is claimed. In view of the foregoing, the Instant Claims of the present application are found to be patentable over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Conclusion***

All claims are found allowable over prior-art.
